FLEXIBLE POST

Flexible Posts are used to guide traffic or to provide warning of approaching hazards. You can use the Flexible Post in any situation where you must separate traffic simply and safely. The flexible spring post can be bolted to the floor using the base. It will allow emergency services to travel over them when needs be which makes it the most suitable option of separating traffic on busy public roads. Also called flexible bollards or spring posts, these can be installed in numerous manners and will withstand numerous impacts with vehicles. We offer spring posts in many sizes to cater to our customers' requirements.

Key Features:

- Frontier flexible post is made of polyurethane which is strong & resistant against crashes and shocks
- Extremely flexible & soft so as not to damage the vehicle at collision and to be restored soon to its original shape
- 3 sets of bolts at base can be removed without damaging the surface of asphalt
- One piece construction allows for greater durability
- UV stabilized and non-fading colours used
- Extremely high quality of reflective sheeting used
